

REACH - always on the safe side with Rhenus Lub.

rhenus coolants are preparations which are not subject to the registration requirements of REACH.

Nevertheless, the raw materials used must meet the requirements of REACH.

All products from Rhenus Lub are compliant with REACH. For this reason, all relevant substances that are not expressly exempted from the Directive must be registered in accordance with the provisions of REACH.

Rhenus Lub guarantees this and thus offers their customers absolute security according to the current requirements. Additionally, Rhenus Lub ensures in European consortia together with other lubricant manufacturers that all chemical substances that are used in rhenus high-performance greases are proactively researched, documented and registered.

At a glance:

- **All rhenus products are REACH-conform**
- **Substances are registered according to REACH**
- **Security through transparency of substances**
